URIEL CRUZ

Technical Designer · Unreal Engine 5 · Gameplay Systems & GAS

Prague, Czech Republic · urielcruz@proton.me · linkedin.com/in/urielcruz · urielcruzmar.github.io

PROFESSIONAL SUMMARY

Technical Designer specialized in Unreal Engine 5 (C++, Blueprints, GAS) with 3+ years of AA/AAA experience. I build the systems that make games feel good: multi-phase boss encounters, GAS-based ability frameworks, production-ready Motion Matching pipelines, and data-driven architectures that let design iterate without engineering bottlenecks. Currently driving feature ownership at GRIP Studios across Tomb Raider: Legacy of Atlantis and unannounced AAA titles, with prior work leading movement and parkour systems at DALOAR Studios and directing a full Unity-to-UE5 engine migration at HechicerIA.

Core Focus: Feature Ownership · 3Cs & Player Mechanics · Boss & Combat Design · UE5 Architecture

CORE SKILLS

Engines	Unreal Engine 4/5 · Unity
Programming	C++ · Blueprints · Python · Lua · C# · Java · SQL
Key Systems	Gameplay Ability System (GAS) · Motion Matching · AI Behavior Trees · Physics Simulation · Network Replication
Design	Combat & Boss Design · Technical Level Design · Modular System Architecture · Data-Driven Design
Tools	Perforce · Git · Jira · RenderDoc · Profiling Tools
Languages	Spanish (Native) · English (Full Professional)

PROFESSIONAL EXPERIENCE

Technical Designer (UE5) GRIP Studios

Apr 2025 – Present · Prague, Czech Republic

Projects: *Tomb Raider: Legacy of Atlantis · Unannounced AAA Projects | UE5, C++, Blueprints, GAS, Perforce*

- **Feature Ownership:** Own primary 3C systems, player mechanics, and interactive features end-to-end, from concept through production.
- **Boss & Combat Design:** Designed and scripted complex multi-phase boss fights and enemy AI logic in Tomb Raider: Legacy of Atlantis using C++ and Blueprints, covering attack patterns, phase transitions, and player readability.
- **Architecture & TDDs:** Author comprehensive Technical Design Documents and build modular, scalable gameplay frameworks adopted studio-wide.
- **Optimization:** Debug and optimize gameplay systems for target performance (60+ FPS) across AAA unannounced titles.
- **Cross-Discipline Alignment:** Partner with lead designers, animation, and engineering to align technical execution with game vision.

Technical Designer (UE5) DALOAR Studios

Dec 2023 – Dec 2024 · Valladolid, Spain

Projects: *Unannounced Action-RPG AAA Title · The Occultist (Support) | UE5, C++, GAS, Motion Matching*

- Designed a production-ready Motion Matching system integrated with a custom animation pipeline, shipping at 60+ FPS on target hardware.
- Built a context-aware parkour system (climb, vault, mantle, slide) with predictive environment detection using Blueprints and C++.
- Implemented a fully network-replicated GAS ability framework, letting designers configure abilities through Data Assets without code changes.
- Provided GAS mentorship and technical support to the wider team, including The Occultist.

Technical Designer (Unreal Engine) HechicerIA

Jan 2022 – Mar 2023 · Spain

Projects: *Current Anima | UE5, Unity, C++, Blueprints*

- Led the full technical migration of Current Anima from Unity to Unreal Engine 5, establishing new production pipelines, coding standards, and Perforce/Git workflows.
- Trained and mentored the development team on UE5 best practices and Blueprint/C++ architecture.

Technical Designer (Unreal Engine) ORENJI GAMES SL

Nov 2022 – Jun 2023 · Part-time / Freelance · Spain (Remote)

Projects: *Tears of Elara | UE5, Blueprints, C++*

- Developed Blueprint/C++ interaction systems, AI state machines, level scripting, and editor utilities to streamline designer workflows.
- Implemented core combat mechanics, progression systems, and UI integration.

Software Developer Everis (NTT DATA)

Oct 2019 – Jun 2020 · Valencia, Spain

- Delivered backend development, testing, and incident resolution for enterprise-level systems using Java, SQL, and XML.

Web Developer Verkia

Mar 2019 – Jun 2019 · Spain

- Designed, developed, and tested full-stack web applications.

EDUCATION

- **Master in Video Game Programming (Unreal Engine & C++)** — Tokio School · 2020–2022
- **Advanced Course in Video Game Design** — Tokio School · 2020–2022
- **Senior Technician in Multiplatform Application Development** — IES Poeta Paco Mollà · 2017–2019
- **Higher Technician in Sociocultural and Tourist Animation** — CIPFP Valle de Elda · 2020–2022
- **Java FullStack and Angular Course** — Industrial Organization School · 2019
